

I am requesting that you reject the NAB's petition 04-160. I do like and enjoy xm radio, this is a service that I choose and pay for. I do like the quality and the service. In traveling across this great country of ours it is great to always have service and the type of music I enjoy while knowing if there is a threat from the weather I will also benefit from that information, and information on traffic that I might need to know. Thank you Peg Gilmore
